> *A context manager for use when defining a Python op.*

Function Signatures

```
tf.name_scope( name ) -> None
```

```
def my_op(a, b, c, name=None): with tf.name_scope("MyOp") as scope: a = tf.convert_to_tensor(a, name="a") b = tf.convert_to_tensor(b, name="b") c = tf.convert_to_tensor(c, name="c") # Define some computation that uses `a`, `b`, and `c`. return foo_op(..., name=scope)
```

Code Examples

```
tf.name_scope(
name
) -> None
```

```
tf.name_scope(
name
) -> None
```

```
def my_op(a, b, c, name=None):
with tf.name_scope("MyOp") as scope:
a = tf.convert_to_tensor(a, name="a")
b = tf.convert_to_tensor(b, name="b")
c = tf.convert_to_tensor(c, name="c")
# Define some computation that uses `a`, `b`, and `c`.
return foo_op(..., name=scope)
```

```
def my_op(a, b, c, name=None):
with tf.name_scope("MyOp") as scope:
a = tf.convert_to_tensor(a, name="a")
b = tf.convert_to_tensor(b, name="b")
c = tf.convert_to_tensor(c, name="c")
# Define some computation that uses `a`, `b`, and `c`.
return foo_op(..., name=scope)
```

```
__enter__() -> str
```

```
__enter__() -> str
```

```
__exit__(
type_arg: None, value_arg: None, traceback_arg: None
) -> bool
```

```
__exit__(
type_arg: None, value_arg: None, traceback_arg: None
) -> bool
```

Documentation

A context manager for use when defining a Python op.

Used in the notebooks

• Migrating model checkpoints

- Displaying text data in TensorBoard
- Graph-based Neural Structured Learning in TFX

This context manager pushes a name scope, which will make the name of all operations added within it have a prefix.

For example, to define a new Python op called my_op:

When executed, the Tensors a, b, c, will have names MyOp/a, MyOp/b, and MyOp/c.

Inside a tf.function, if the scope name already exists, the name will be made unique by appending _n. For example, calling my_op the second time will generate MyOp_1/a, etc.

Raises

Attributes

Methods

__enter__

View source

Start the scope block.

__exit__

View source

Raise any exception triggered within the runtime context.
