> *Extract patches from input and put them in the "depth" output dimension. 3D extension of extract_image_patches.*

Code Examples

```
tf.extract_volume_patches(
input: Annotated[Any, TV_ExtractVolumePatches_T],
ksizes,
strides,
padding: str,
name=None
) -> Annotated[Any, TV_ExtractVolumePatches_T]
```

```
tf.extract_volume_patches(
input: Annotated[Any, TV_ExtractVolumePatches_T],
ksizes,
strides,
padding: str,
name=None
) -> Annotated[Any, TV_ExtractVolumePatches_T]
```

```
ksizes = [1, ksize_planes, ksize_rows, ksize_cols, 1]
strides = [1, stride_planes, strides_rows, strides_cols, 1]
```

```
ksizes = [1, ksize_planes, ksize_rows, ksize_cols, 1]
strides = [1, stride_planes, strides_rows, strides_cols, 1]
```

Documentation

Extract patches from input and put them in the "depth" output dimension. 3D extension of extract_image_patches.
