torch.ones_like#

https://pytorch.org/docs/stable/generated/torch.ones_like.html

Description:

Returns a tensor filled with the scalar value 1, with the same size as input. torch.ones_like(input) is equivalent to torch.ones(input.size(), dtype=input.dtype, layout=input.layout, device=input.device). As of 0.4, this function does not support an out keyword. As an alternative, the old torch.ones_like(input, out=output) is equivalent to torch.ones(input.size(), out=output). input (Tensor) – the size of input will determine size of the output tensor. dtype (torch.dtype, optional) – the desired data type of returned Tensor. Default: if None, defaults to the dtype of input.

Function Signature

```
torch.ones_like(input, *, dtype=None, layout=None,
device=None, requires_grad=False,
memory_format=torch.preserve_format) → Tensor#

Parameters

Keyword Arguments
```

Parameters

Keyword

dtype (torch.dtype, optional) – the desired data type of returned Tensor. Default: if None, defaults to the dtype of input. layout (torch.layout, optional) – the desired layout of returned tensor. Default: if None, defaults to the layout of input. device (torch.device, optional) – the desired device of returned tensor. Default: if None, defaults to the device of input. requires_grad (bool, optional) – If autograd should record operations on the returned tensor. Default: False. memory_format (torch.memory_format, optional) – the desired memory format of returned Tensor. Default: torch.preserve_format.

Code Examples

```
>>> input = torch.empty(2, 3)
>>> torch.ones_like(input)
tensor([[ 1.,  1.,  1.],
        [ 1.,  1.,  1.]])
```

Notes & Warnings

⚠ **WARNING**

Warning As of 0.4, this function does not support an out keyword. As an alternative, the old torch.ones_like(input, out=output) is equivalent to torch.ones(input.size(), out=output).

Detailed Documentation

Documentation

Returns a tensor filled with the scalar value 1, with the same size as input. torch.ones_like(input) is equivalent to torch.ones(input.size(), dtype=input.dtype, layout=input.layout, device=input.device).

As of 0.4, this function does not support an out keyword. As an alternative, the old torch.ones_like(input, out=output) is equivalent to torch.ones(input.size(), out=output).

input (Tensor) – the size of input will determine size of the output tensor.

dtype (torch.dtype, optional) – the desired data type of returned Tensor. Default: if None, defaults to the dtype of input.

layout (torch.layout, optional) – the desired layout of returned tensor. Default: if None, defaults to the layout of input.

device (torch.device, optional) – the desired device of returned tensor. Default: if None, defaults to the device of input.

requires_grad (bool, optional) – If autograd should record operations on the returned tensor. Default: False.

memory_format (torch.memory_format, optional) – the desired memory format of returned Tensor. Default: torch.preserve_format.
