torch.cuda.manual_seed#

https://pytorch.org/docs/stable/generated/torch.cuda.manual_seed.html

Description:

Set the seed for generating random numbers for the current GPU. It's safe to call this function if CUDA is not available; in that case, it is silently ignored. seed (int) – The desired seed. If you are working with a multi-GPU model, this function is insufficient to get determinism. To seed all GPUs, use manual_seed_all().

Function Signature

```
torch.cuda.manual_seed(seed)[source]#

Parameters
```

Notes & Warnings

> ⚠ **WARNING** Warning If you are working with a multi-GPU model, this function is insufficient to get determinism. To seed all GPUs, use manual_seed_all().

Detailed Documentation

Documentation

Set the seed for generating random numbers for the current GPU.

It’s safe to call this function if CUDA is not available; in that case, it is silently ignored.

seed (int) – The desired seed.

If you are working with a multi-GPU model, this function is insufficient to get determinism. To seed all GPUs, use manual_seed_all().

Set the seed for generating random numbers for the current GPU.

It’s safe to call this function if CUDA is not available; in that case, it is silently ignored.

seed (int) – The desired seed.

If you are working with a multi-GPU model, this function is insufficient to get determinism. To seed all GPUs, use manual_seed_all().
