# torch.isinf#

https://pytorch.org/docs/stable/generated/torch.isinf.html#torch.isinf

**Description:**

Tests if each element of input is infinite (positive or negative infinity) or not. Complex values are infinite when their real or imaginary part is infinite. input (Tensor) – the input tensor. A boolean tensor that is True where input is infinite and False elsewhere

## Function Signature

```
torch.isinf(input) → Tensor#
Parameters
Returns
```

**Returns:**

A boolean tensor that is True where input is infinite and False elsewhere

## Code Examples

```
>>> torch.isinf(torch.tensor([1, float('inf'), 2, float('-inf'),
float('nan')]))
tensor([False,  True,  False,  True,  False])
```

## Notes & Warnings

**NOTE**

Note Complex values are infinite when their real or imaginary part is infinite.

# Detailed Documentation

## Documentation

Tests if each element of input is infinite (positive or negative infinity) or not.

Complex values are infinite when their real or imaginary part is infinite.

input (Tensor) – the input tensor.

A boolean tensor that is True where input is infinite and False elsewhere

Tests if each element of input is infinite (positive or negative infinity) or not.

Complex values are infinite when their real or imaginary part is infinite.

input (Tensor) – the input tensor.

A boolean tensor that is True where input is infinite and False elsewhere
