https://www.tensorflow.org/api_docs/python/tf/compat/path_to_str

Converts input which is a PathLike object to str type.

Function Signatures

```
tf.compat.path_to_str( path )
```

Code Examples

```
tf.compat.path_to_str(  
    path  
)
```

```
tf.compat.path_to_str(  
    path  
)
```

```
$ tf.compat.path_to_str('C:\XYZ\tensorflow\../../tensorflow')
'C:\XYZ\tensorflow\../../tensorflow' # Windows OS
$
tf.compat.path_to_str(Path('C:\XYZ\tensorflow\../../tensorflow'))
'C:\XYZ\tensorflow\..\tensorflow' # Windows OS
$ tf.compat.path_to_str(Path('../corpus'))
'corpus' # Linux OS
$ tf.compat.path_to_str('../../Corpus')
'../../Corpus' # Linux OS
$ tf.compat.path_to_str(Path('../../Corpus'))
'../Corpus' # Linux OS
$ tf.compat.path_to_str(Path('../../../../../'))
'../..' # Linux OS
```

```
$ tf.compat.path_to_str('C:\XYZ\tensorflow\../../tensorflow')
'C:\XYZ\tensorflow\../../tensorflow' # Windows OS
$
tf.compat.path_to_str(Path('C:\XYZ\tensorflow\../../tensorflow'))
'C:\XYZ\tensorflow\..\tensorflow' # Windows OS
$ tf.compat.path_to_str(Path('../corpus'))
'corpus' # Linux OS
$ tf.compat.path_to_str('../../Corpus')
'../../Corpus' # Linux OS
$ tf.compat.path_to_str(Path('../../Corpus'))
'../Corpus' # Linux OS
$ tf.compat.path_to_str(Path('../../../../../'))
'../..' # Linux OS
```

Documentation

Converts input which is a PathLike object to str type.

See

Migration guide for
more details.

`tf.compat.v1.compat.path_to_str`

Converts from any python constant representation of a PathLike object to a string. If the input is not a PathLike object, simply returns the input.

Returns

Examples:
