https://www.tensorflow.org/api_docs/python/tf/compat/v1/add_check_numerics_ops

Connect a `tf.debugging.check_numerics` to every floating point tensor.

Function Signatures

```
tf.compat.v1.add_check_numerics_ops()
```

Code Examples

```
tf.compat.v1.add_check_numerics_ops()
```

```
tf.compat.v1.add_check_numerics_ops()
```

Documentation

Connect a `tf.debugging.check_numerics` to every floating point tensor.

`check_numerics` operations themselves are added for each half, float, or double tensor in the current default graph. For all ops in the graph, the `check_numerics` op for all of its (half, float, or double) inputs is guaranteed to run before the `check_numerics` op on any of its outputs.

Returns

Raises

eager compatibility

Not compatible with eager execution. To check for Infs and NaNs under eager execution, call `tf.debugging.enable_check_numerics()` once before executing the checked operations.
