https://www.tensorflow.org/api_docs/python/tf/compat/v1/assert_integer

Assert that x is of integer dtype.

Function Signatures

```
tf.compat.v1.assert_integer( x, message=None, name=None )  
with  
tf.control_dependencies([tf.compat.v1.assert_integer(x)]):  
    output = tf.reduce_sum(x)
```

Code Examples

```
tf.compat.v1.assert_integer(  
x, message=None, name=None  
)
```

```
tf.compat.v1.assert_integer(  
x, message=None, name=None  
)
```

```
with tf.control_dependencies([tf.compat.v1.assert_integer(x)]):  
output = tf.reduce_sum(x)
```

```
with tf.control_dependencies([tf.compat.v1.assert_integer(x)]):  
output = tf.reduce_sum(x)
```

Documentation

Assert that x is of integer dtype.
