---

*Asserts that the given tensor is a scalar (i.e. zero-dimensional).*

## Function Signatures

---

```
tf.compat.v1.assert_scalar( tensor, name=None, message=None )
```

## Code Examples

---

```
tf.compat.v1.assert_scalar(  
    tensor, name=None, message=None  
)
```

```
tf.compat.v1.assert_scalar(  
    tensor, name=None, message=None  
)
```

# Documentation

---

Asserts that the given tensor is a scalar (i.e. zero-dimensional).
