Public API for `tf._api.v2.data` namespace

Documentation

Public API for `tf._api.v2.data` namespace

Modules

experimental module: Public API for `tf._api.v2.data.experimental` namespace

Classes

class `Dataset`: Represents a potentially large set of elements.

class `DatasetSpec`: Type specification for `tf.data.Dataset`.

class `FixedLengthRecordDataset`: A `Dataset` of fixed-length records from one or more binary files.

class `Iterator`: Represents the state of iterating through a `Dataset`.

class `NumpyIterator`: Iterator over a dataset with elements converted to numpy.

class `Options`: Represents options for `tf.data.Dataset`.

class TFRecordDataset: A Dataset comprising records from one or more TFRecord files.

class TextLineDataset: A Dataset comprising lines from one or more text files.

class ThreadingOptions: Represents options for dataset threading.

Functions

get_output_classes(...): Returns the output classes for elements of the input dataset / iterator.

get_output_shapes(...): Returns the output shapes for elements of the input dataset / iterator.

get_output_types(...): Returns the output shapes for elements of the input dataset / iterator.

make_initializable_iterator(...): Creates an iterator for elements of dataset.

make_one_shot_iterator(...): Creates an iterator for elements of dataset.
