https://www.tensorflow.org/api_docs/python/tf/compat/v1/data/get_output_classes

Returns the output classes for elements of the input dataset / iterator.

Function Signatures

```
tf.compat.v1.data.get_output_classes( dataset_or_iterator )
```

Code Examples

```
tf.compat.v1.data.get_output_classes(  
dataset_or_iterator  
)
```

```
tf.compat.v1.data.get_output_classes(  
dataset_or_iterator  
)
```

Documentation

Returns the output classes for elements of the input dataset / iterator.

Migrate to TF2

This is a legacy API for inspecting the type signature of dataset elements. In TF 2, you should use the `tf.data.Dataset.element_spec` attribute instead.

Description

Returns
