Public API for tf._api.v2.distribute.experimental namespace

Documentation

Public API for `tf._api.v2.distribute.experimental` namespace

Classes

class `CentralStorageStrategy`: A one-machine strategy that puts all variables on a single device.

class `CollectiveCommunication`: Cross device communication implementation.

class `CollectiveHints`: Hints for collective operations like `AllReduce`.

class `CommunicationImplementation`: Cross device communication implementation.

class `CommunicationOptions`: Options for cross device communications like `All-reduce`.

class `MultiWorkerMirroredStrategy`: A distribution strategy for synchronous training on multiple workers.

class `ParameterServerStrategy`: An asynchronous multi-worker parameter server `tf.distribute` strategy.

class `TPUStrategy`: TPU distribution strategy implementation.
