https://www.tensorflow.org/api_docs/python/tf/compat/v1/flags/DEFINE_list

Registers a flag whose value is a comma-separated list of strings.

Function Signatures

```
tf.compat.v1.flags.DEFINE_list( name, default, help,  
flag_values=_flagvalues.FLAGS, required=False, **args )
```

Code Examples

```
tf.compat.v1.flags.DEFINE_list(  
name, default, help, flag_values=_flagvalues.FLAGS, required=False,  
**args  
)
```

```
tf.compat.v1.flags.DEFINE_list(  
name, default, help, flag_values=_flagvalues.FLAGS, required=False,  
**args  
)
```

Documentation

Registers a flag whose value is a comma-separated list of strings.

The flag value is parsed with a CSV parser.

Returns
