https://www.tensorflow.org/api_docs/python/tf/compat/v1/flags/EnumClassParser

Parser of an Enum class member.

Function Signatures

```
tf.compat.v1.flags.EnumClassParser( enum_class: Type[_ET],  
case_sensitive: bool = True ) -> None
```

Code Examples

```
tf.compat.v1.flags.EnumClassParser(  
  enum_class: Type[_ET], case_sensitive: bool = True  
) -> None
```

```
tf.compat.v1.flags.EnumClassParser(  
  enum_class: Type[_ET], case_sensitive: bool = True  
) -> None
```

```
flag_type() -> Text
```

```
flag_type() -> Text
```

```
parse(  
  argument: Union[_ET, Text]  
) -> _ET
```

```
parse(  
  argument: Union[_ET, Text]  
) -> _ET
```

Documentation

Parser of an Enum class member.

Inherits From: `ArgumentParser`

Raises

`##` Attributes

Methods

`##` `flag_type`

See base class.

Determines validity of argument and returns the correct element of enum.

`##` Class Variables
