tf.compat.v1.flags.override_value(
flag_holder: _flagvalues.FlagHolder[_T], value: _T
) -> None
```

```
tf.compat.v1.flags.override_value(
flag_holder: _flagvalues.FlagHolder[_T], value: _T
) -> None
```

Documentation

Overrides the value of the provided flag.

This value takes precedent over the default value and, when called after flag parsing, any value provided at the command line.
