https://www.tensorflow.org/api_docs/python/tf/compat/v1/flags/validator

A function decorator for defining a flag validator.

Function Signatures

```
tf.compat.v1.flags.validator( flag_name, message='Flag
validation failed', flag_values=_flagvalues.FLAGS )
@flags.validator('foo') def _CheckFoo(foo): ...
```

Code Examples

```
tf.compat.v1.flags.validator(  
    flag_name,  
    message='Flag validation failed',  
    flag_values=_flagvalues.FLAGS  
)
```

```
tf.compat.v1.flags.validator(  
    flag_name,  
    message='Flag validation failed',  
    flag_values=_flagvalues.FLAGS  
)
```

```
@flags.validator('foo')  
def _CheckFoo(foo):  
    ...
```

```
@flags.validator('foo')  
def _CheckFoo(foo):  
    ...
```

Documentation

A function decorator for defining a flag validator.

Registers the decorated function as a validator for `flag_name`, e.g.::

See `:func:register_validator` for the specification of checker function.
