https://www.tensorflow.org/api_docs/python/tf/compat/v1/lite/TocoConverter

Convert a TensorFlow model into output_format.

Function Signatures

```
from_frozen_graph( graph_def_file, input_arrays,  
output_arrays, input_shapes=None )
```

Code Examples

```
@classmethod  
from_frozen_graph(  
graph_def_file, input_arrays, output_arrays, input_shapes=None  
)
```

```
@classmethod
```

```
from_frozen_graph(  
graph_def_file, input_arrays, output_arrays, input_shapes=None  
)
```

```
@classmethod
from_keras_model_file(
model_file, input_arrays=None, input_shapes=None,
output_arrays=None
)
```

```
@classmethod
```

```
from_keras_model_file(
model_file, input_arrays=None, input_shapes=None,
output_arrays=None
)
```

```
@classmethod
from_saved_model(
saved_model_dir,
input_arrays=None,
input_shapes=None,
output_arrays=None,
tag_set=None,
signature_key=None
)
```

```
@classmethod
```

Documentation

Convert a TensorFlow model into output_format.

This class has been deprecated. Please use `lite.TFLiteConverter` instead.

Methods

`## from_frozen_graph`

[View source](#)

Creates a `TocoConverter` class from a file containing a frozen graph.
(deprecated)

from_keras_model_file

[View source](#)

Creates a `TocoConverter` class from a `tf.keras` model file. (deprecated)

from_saved_model

[View source](#)

Creates a `TocoConverter` class from a `SavedModel`. (deprecated)

from_session

[View source](#)

Creates a `TocoConverter` class from a TensorFlow Session. (deprecated)
