

tf.compat.v1.math.ceil Stay organized with collections Save and categorize content based on your preferences.

https://www.tensorflow.org/api_docs/python/tf/compat/v1/math/ceil

Return the ceiling of the input, element-wise.

Function Signatures

```
tf.compat.v1.math.ceil( x, name=None )  
tf.math.ceil([-1.7, -1.5, -0.2, 0.2, 1.5, 1.7, 2.0])  
numpy=array([-1., -1., -0., 1., 2., 2., 2.], dtype=float32)>
```

Code Examples

```
tf.compat.v1.math.ceil(  
    x, name=None  
)
```

```
tf.compat.v1.math.ceil(  
    x, name=None  
)
```

```
tf.math.ceil([-1.7, -1.5, -0.2, 0.2, 1.5, 1.7, 2.0])
```

```
tf.math.ceil([-1.7, -1.5, -0.2, 0.2, 1.5, 1.7, 2.0])
```

```
numpy=array([-1., -1., -0., 1., 2., 2., 2.],  
dtype=float32)>
```

Documentation

Return the ceiling of the input, element-wise.

For example:

`## Returns`

numpy compatibility

Equivalent to `np.ceil`
