https://www.tensorflow.org/api_docs/python/tf/compat/v1/math/log_softmax

Computes log softmax activations. (deprecated arguments)

Function Signatures

```
tf.compat.v1.math.log_softmax( logits, axis=None, name=None,  
dim=None )  
(dim)
```

Code Examples

```
tf.compat.v1.math.log_softmax(  
logits, axis=None, name=None, dim=None  
)
```

```
tf.compat.v1.math.log_softmax(  
logits, axis=None, name=None, dim=None  
)
```

```
logsoftmax = logits - log(reduce_sum(exp(logits), axis))
```

```
logsoftmax = logits - log(reduce_sum(exp(logits), axis))
```

Documentation

Computes log softmax activations. (deprecated arguments)
