https://www.tensorflow.org/api_docs/python/tf/compat/v1/math/multiply_no_nan

Computes the product of x and y and returns 0 if the y is zero, even if x is NaN or infinite.

Function Signatures

```
tf.compat.v1.math.multiply_no_nan( x, y, name=None )
```

Code Examples

```
tf.compat.v1.math.multiply_no_nan(  
x, y, name=None  
)
```

```
tf.compat.v1.math.multiply_no_nan(  
x, y, name=None  
)
```

Documentation

Computes the product of x and y and returns 0 if the y is zero, even if x is NaN or infinite.

Note this is noncommutative: if y is NaN or infinite and x is 0, the result will be NaN.
