https://www.tensorflow.org/api_docs/python/tf/compat/v1/math/special/fresnel_cos

Computes Fresnel's cosine integral of x element-wise.

Function Signatures

```
tf.compat.v1.math.special.fresnel_cos( x, name=None )  
cos(t^2)
```

Code Examples

```
tf.compat.v1.math.special.fresnel_cos(  
x, name=None  
)
```

```
tf.compat.v1.math.special.fresnel_cos(  
x, name=None  
)
```

```
>>> tf.math.special.fresnel_cos([-1., -0.1, 0.1, 1.]).numpy()  
array([-0.7798934 , -0.09999753,  0.09999753,  0.7798934 ],  
      dtype=float32)
```

```
>>> tf.math.special.fresnel_cos([-1., -0.1, 0.1, 1.]).numpy()  
array([-0.7798934 , -0.09999753,  0.09999753,  0.7798934 ],  
      dtype=float32)
```

Documentation

Computes Fresnel's cosine integral of x element-wise.

The Fresnel cosine integral is defined as the integral of $\cos(t^2)$ from 0 to x , with the domain of definition all real numbers.

The Fresnel cosine integral is odd.

This implementation is based off of the Cephes math library.

Returns

scipy compatibility

Equivalent to `scipy.special.fresnel` second output.
