https://www.tensorflow.org/api_docs/python/tf/compat/v1/math/special/spence

Computes Spence's integral of x element-wise.

Function Signatures

```
tf.compat.v1.math.special.spence( x, name=None )  
 $\log(t) / (1 - t)$ 
```

Code Examples

```
tf.compat.v1.math.special.spence(  
x, name=None  
)
```

```
tf.compat.v1.math.special.spence(  
x, name=None  
)
```

```
tf.math.special.spence([0.5, 1., 2., 3.]).numpy()  
array([ 0.58224034,  0.          , -0.82246685, -1.4367464],  
dtype=float32)
```

```
tf.math.special.spence([0.5, 1., 2., 3.]).numpy()
```

```
array([ 0.58224034,  0.          , -0.82246685, -1.4367464],  
dtype=float32)
```

Documentation

Computes Spence's integral of x element-wise.

Spence's integral is defined as the integral of $\log(t) / (1 - t)$ from 1 to x , with the domain of definition all non-negative real numbers.

This implementation is based off of the Cephes math library.

Returns

scipy compatibility

Equivalent to `scipy.special.spence`
