https://www.tensorflow.org/api_docs/python/tf/compat/v1/moving_average_variables

Returns all variables that maintain their moving averages.

Function Signatures

```
tf.compat.v1.moving_average_variables( scope=None )  
apply()
```

Code Examples

```
tf.compat.v1.moving_average_variables(  
    scope=None  
)
```

```
tf.compat.v1.moving_average_variables(  
    scope=None  
)
```

Documentation

Returns all variables that maintain their moving averages.

If an `ExponentialMovingAverage` object is created and the `apply()` method is called on a list of variables, these variables will be added to the `GraphKeys.MOVING_AVERAGE_VARIABLES` collection. This convenience function returns the contents of that collection.

Returns
