https://www.tensorflow.org/api_docs/python/tf/compat/v1/nn/conv3d_backprop_filter

Computes the gradients of 3-D convolution with respect to the filter.

Function Signatures

```
tf.compat.v1.nn.conv3d_backprop_filter( input: Annotated[Any,
TV_Conv3DBackpropFilterV2_T], filter_sizes: Annotated[Any,
_atypes.Int32], out_backprop: Annotated[Any,
TV_Conv3DBackpropFilterV2_T], strides, padding: str,
data_format: str = 'NDHWC', dilations=[1, 1, 1, 1, 1],
name=None ) -> Annotated[Any, TV_Conv3DBackpropFilterV2_T]
```

Code Examples

```
tf.compat.v1.nn.conv3d_backprop_filter(  
    input: Annotated[Any, TV_Conv3DBackpropFilterV2_T],  
    filter_sizes: Annotated[Any, _atypes.Int32],  
    out_backprop: Annotated[Any, TV_Conv3DBackpropFilterV2_T],  
    strides,  
    padding: str,  
    data_format: str = 'NDHWC',  
    dilations=[1, 1, 1, 1, 1],  
    name=None  
) -> Annotated[Any, TV_Conv3DBackpropFilterV2_T]
```

```
tf.compat.v1.nn.conv3d_backprop_filter(  
    input: Annotated[Any, TV_Conv3DBackpropFilterV2_T],  
    filter_sizes: Annotated[Any, _atypes.Int32],  
    out_backprop: Annotated[Any, TV_Conv3DBackpropFilterV2_T],  
    strides,  
    padding: str,  
    data_format: str = 'NDHWC',  
    dilations=[1, 1, 1, 1, 1],  
    name=None  
) -> Annotated[Any, TV_Conv3DBackpropFilterV2_T]
```

Documentation

Computes the gradients of 3-D convolution with respect to the filter.
