https://www.tensorflow.org/api_docs/python/tf/compat/v1/nn/static_state_saving_rnn

*RNN that accepts a state saver for time-truncated RNN calculation.
(deprecated)*

Function Signatures

```
tf.compat.v1.nn.static_state_saving_rnn( cell, inputs,  
state_saver, state_name, sequence_length=None, scope=None )  
keras.layers.RNN(cell, stateful=True)
```

Code Examples

```
tf.compat.v1.nn.static_state_saving_rnn(  
cell, inputs, state_saver, state_name, sequence_length=None,  
scope=None  
)
```

```
tf.compat.v1.nn.static_state_saving_rnn(  
cell, inputs, state_saver, state_name, sequence_length=None,  
scope=None  
)
```

Documentation

RNN that accepts a state saver for time-truncated RNN calculation. (deprecated)
