

tf.compat.v1.profiler.write_op_log Stay organized with collections Save and categorize content based on your preferences.

https://www.tensorflow.org/api_docs/python/tf/compat/v1/profiler/write_op_log

Log provided 'op_log', and add additional model information below.

Function Signatures

```
tf.compat.v1.profiler.write_op_log( graph, log_dir,  
op_log=None, run_meta=None, add_trace=True )
```

Code Examples

```
tf.compat.v1.profiler.write_op_log(  
graph, log_dir, op_log=None, run_meta=None, add_trace=True  
)
```

```
tf.compat.v1.profiler.write_op_log(  
graph, log_dir, op_log=None, run_meta=None, add_trace=True  
)
```

Documentation

Log provided 'op_log', and add additional model information below.

The API also assigns ops in `tf.compat.v1.trainable_variables()` an op type called `'_trainable_variables'`.

The API also logs 'flops' statistics for ops with `op.RegisterStatistics()` defined. flops calculation depends on Tensor shapes defined in 'graph', which might not be complete. 'run_meta', if provided, completes the shape information with best effort.
