https://www.tensorflow.org/api_docs/python/tf/compat/v1/reset_default_graph

Clears the default graph stack and resets the global default graph.

Function Signatures

```
tf.compat.v1.reset_default_graph() -> None
```

Code Examples

```
tf.compat.v1.reset_default_graph() -> None
```

```
tf.compat.v1.reset_default_graph() -> None
```

Documentation

Clears the default graph stack and resets the global default graph.

Migrate to TF2

`reset_default_graph` does not work with either eager execution or `tf.function`, and you should not invoke it directly. To migrate code that uses Graph-related functions to TF2, rewrite the code without them. See the [migration guide](#) for more description about the behavior and semantic changes between Tensorflow 1 and Tensorflow 2.

Description

Used in the notebooks

- [Generating Images with BigGAN](#)
- [Classify Flowers with Transfer Learning](#)
- [Generating Images with Little Data Using S3GAN](#)
- [Fitting Dirichlet Process Mixture Model Using Preconditioned Stochastic Gradient Langevin Dynamics](#)
- [Linear Mixed-Effect Regression in {TF Probability, R, Stan}](#)
