https://www.tensorflow.org/api_docs/python/tf/compat/v1/saved_model/contains_saved_model

Checks whether the provided export directory could contain a SavedModel.

Function Signatures

```
tf.compat.v1.saved_model.contains_saved_model( export_dir )
```

Code Examples

```
tf.compat.v1.saved_model.contains_saved_model(  
    export_dir  
)
```

```
tf.compat.v1.saved_model.contains_saved_model(  
    export_dir  
)
```

Documentation

Checks whether the provided export directory could contain a SavedModel.

Compat aliases for migration

See

Migration guide for
more details.

`tf.compat.v1.saved_model.loader.maybe_saved_model_directory`,
`tf.compat.v1.saved_model.maybe_saved_model_directory`

Note that the method does not load any data by itself. If the method returns false, the export directory definitely does not contain a SavedModel. If the method returns true, the export directory may contain a SavedModel but provides no guarantee that it can be loaded.
