

tf.compat.v1.size Stay organized with collections Save and categorize content based on your preferences.

https://www.tensorflow.org/api_docs/python/tf/compat/v1/size

Returns the size of a tensor.

Function Signatures

```
tf.compat.v1.size( input, name=None, out_type=None )  
t = tf.constant([[[1, 1, 1], [2, 2, 2]], [[3, 3, 3], [4, 4, 4]]]) tf.size(t) # 12
```

Code Examples

```
tf.compat.v1.size(  
input, name=None, out_type=None  
)
```

```
tf.compat.v1.size(  
input, name=None, out_type=None  
)
```

```
t = tf.constant([[[1, 1, 1], [2, 2, 2]], [[3, 3, 3], [4, 4, 4]]])  
tf.size(t)  # 12
```

```
t = tf.constant([[[1, 1, 1], [2, 2, 2]], [[3, 3, 3], [4, 4, 4]]])  
tf.size(t)  # 12
```

Documentation

Returns the size of a tensor.

Returns a 0-D Tensor representing the number of elements in input of type `out_type`. Defaults to `tf.int32`.

For example:

Returns

numpy compatibility

Equivalent to `np.size()`
