

Module: tf.autograph Stay organized with collections Save and categorize content based on your preferences.

https://www.tensorflow.org/api_docs/python/tf/autograph

Public API for tf._api.v2.autograph namespace

Function Signatures

```
set_verbosity(...)  
to_code(...)  
to_graph(...)  
trace(...)
```

Documentation

Public API for `tf._api.v2.autograph` namespace

Modules

`experimental` module: Public API for `tf._api.v2.autograph.experimental` namespace

Functions

`set_verbosity(...)`: Sets the AutoGraph verbosity level.

`to_code(...)`: Returns the source code generated by AutoGraph, as a string.

`to_graph(...)`: Converts a Python entity into a TensorFlow graph.

`trace(...)`: Traces argument information at compilation time.
