

tf.compat.v1.add_to_collection Stay organized with collections Save and categorize content based on your preferences.

https://www.tensorflow.org/api_docs/python/tf/compat/v1/add_to_collection

Wrapper for Graph.add_to_collection() using the default graph.

Function Signatures

```
Graph.add_to_collection()  
tf.compat.v1.add_to_collection( name, value ) -> None
```

Code Examples

```
tf.compat.v1.add_to_collection(  
    name, value  
) -> None
```

```
tf.compat.v1.add_to_collection(  
    name, value  
) -> None
```

Documentation

Wrapper for `Graph.add_to_collection()` using the default graph.

See `tf.Graph.add_to_collection`
for more details.

eager compatibility

Collections are only supported in eager when variables are created inside an `EagerVariableStore` (e.g. as part of a layer or template).
