https://www.tensorflow.org/api_docs/python/tf/compat/v1/assert_variables_initialized

Returns an Op to check if variables are initialized.

Function Signatures

```
tf.compat.v1.assert_variables_initialized( var_list=None )  
report_uninitialized_variables()
```

Code Examples

```
tf.compat.v1.assert_variables_initialized(  
var_list=None  
)
```

```
tf.compat.v1.assert_variables_initialized(  
var_list=None  
)
```

Documentation

Returns an Op to check if variables are initialized.

When run, the returned Op will raise the exception `FailedPreconditionError` if any of the variables has not yet been initialized.

Returns
