https://www.tensorflow.org/api_docs/python/tf/compat/v1/data/experimental/service

Public API for tf._api.v2.data.experimental.service namespace

Function Signatures

`distribute(...)`

Documentation

Public API for `tf._api.v2.data.experimental.service` namespace

Classes

`class CrossTrainerCache`: Options related to the `tf.data` service cross trainer cache.

`class DispatcherConfig`: Configuration class for `tf.data` service dispatchers.

`class ShardingPolicy`: Specifies how to shard data among `tf.data` service workers.

`class WorkerConfig`: Configuration class for `tf.data` service dispatchers.

Functions

`distribute(...)`: A transformation that moves dataset processing to the `tf.data` service.

`from_dataset_id(...)`: Creates a dataset which reads data from the `tf.data` service.

`register_dataset(...)`: Registers a dataset with the `tf.data` service.
