```

```
tf.compat.v1.disable_eager_execution() -> None
```

Documentation

Disables eager execution.

Migrate to TF2

This function is not necessary if you are using TF2. Eager execution is enabled by default. If you want to use Graph mode please consider `tf.function`.

Description

Used in the notebooks

- Multi-worker training with Estimator
- Exploring the TF-Hub CORD-19 Swivel Embeddings
- Wiki40B Language Models

This function can only be called before any Graphs, Ops, or Tensors have been created.
