https://www.tensorflow.org/api_docs/python/tf/compat/v1/flags/DEFINE_spacesepelist

Registers a flag whose value is a whitespace-separated list of strings.

Function Signatures

```
tf.compat.v1.flags.DEFINE_spacesepelist( name, default, help,  
comma_compat=False, flag_values=_flagvalues.FLAGS,  
required=False, **args )
```

Code Examples

```
tf.compat.v1.flags.DEFINE_spaceseplist(  
    name,  
    default,  
    help,  
    comma_compat=False,  
    flag_values=_flagvalues.FLAGS,  
    required=False,  
    **args  
)
```

```
tf.compat.v1.flags.DEFINE_spaceseplist(  
    name,  
    default,  
    help,  
    comma_compat=False,  
    flag_values=_flagvalues.FLAGS,  
    required=False,  
    **args  
)
```

Documentation

Registers a flag whose value is a whitespace-separated list of strings.

Any whitespace can be used as a separator.

Returns
