https://www.tensorflow.org/api_docs/python/tf/compat/v1/flags/adopt_module_key_flags

Declares that all flags key to a module are key to the current module.

Function Signatures

```
tf.compat.v1.flags.adopt_module_key_flags( module: Any,  
flag_values: tf.compat.v1.flags.FlagValues =  
_flagvalues.FLAGS ) -> None
```

Code Examples

```
tf.compat.v1.flags.adopt_module_key_flags(  
    module: Any,  
    flag_values: tf.compat.v1.flags.FlagValues = _flagvalues.FLAGS  
) -> None
```

```
tf.compat.v1.flags.adopt_module_key_flags(  
    module: Any,  
    flag_values: tf.compat.v1.flags.FlagValues = _flagvalues.FLAGS  
) -> None
```

```
tf.compat.v1.flags.FlagValues
```
