https://www.tensorflow.org/api_docs/python/tf/compat/v1/flags/mark_bool_flags_as_mutual_exclusive

Ensures that only one flag among flag_names is True.

Function Signatures

```
tf.compat.v1.flags.mark_bool_flags_as_mutual_exclusive(  
    flag_names, required=False, flag_values=_flagvalues.FLAGS )
```

Code Examples

```
tf.compat.v1.flags.mark_bool_flags_as_mutual_exclusive(  
    flag_names, required=False, flag_values=_flagvalues.FLAGS  
)
```

```
tf.compat.v1.flags.mark_bool_flags_as_mutual_exclusive(  
    flag_names, required=False, flag_values=_flagvalues.FLAGS  
)
```

Documentation

Ensures that only one flag among `flag_names` is `True`.
