https://www.tensorflow.org/api_docs/python/tf/compat/v1/get_default_graph

Returns the default graph for the current thread.

Function Signatures

```
tf.compat.v1.get_default_graph() -> tf.Graph  
Graph.as_default()
```

Code Examples

```
tf.compat.v1.get_default_graph() -> tf.Graph
```

```
tf.compat.v1.get_default_graph() -> tf.Graph
```

Documentation

Returns the default graph for the current thread.

Migrate to TF2

`get_default_graph` does not work with either eager execution or `tf.function`, and you should not invoke it directly. To migrate code that uses Graph-related functions to TF2, rewrite the code without them. See the [migration guide](#) for more description about the behavior and semantic changes between Tensorflow 1 and Tensorflow 2.

Description

The returned graph will be the innermost graph on which a `Graph.as_default()` context has been entered, or a global default graph if none has been explicitly created.

Returns
