

tf.compat.v1.gfile.MkDir Stay organized with collections Save and categorize content based on your preferences.

https://www.tensorflow.org/api_docs/python/tf/compat/v1/gfile/MkDir

Creates a directory with the name dirname.

Function Signatures

```
tf.compat.v1.gfile.MkDir( dirname )
```

Code Examples

```
tf.compat.v1.gfile.MkDir(  
    dirname  
)
```

```
tf.compat.v1.gfile.MkDir(  
    dirname  
)
```

Documentation

Creates a directory with the name `dirname`.

Notes: The parent directories need to exist. Use `tf.io.gfile.makedirs` instead if there is the possibility that the parent dirs don't exist.
