Public API for `tf._api.v2.lite.experimental` namespace

Documentation

Public API for `tf._api.v2.lite.experimental` namespace

Modules

`authoring` module: Public API for `tf._api.v2.lite.experimental.authoring` namespace

Classes

`class Analyzer`: Provides a collection of TFLite model analyzer tools.

`class OpResolverType`: Different types of op resolvers for Tensorflow Lite.

`class QuantizationDebugOptions`: Debug options to set up a given `QuantizationDebugger`.

`class QuantizationDebugger`: Debugger for Quantized TensorFlow Lite debug mode models.

Functions

`convert_op_hints_to_stubs(...)`: Converts a graphdef with LiteOp hints into stub operations. (deprecated)

`load_delegate(...)`: Returns loaded Delegate object.
