https://www.tensorflow.org/api_docs/python/tf/compat/v1/lite/experimental/convert_op_hints_to_stubs

Converts a graphdef with LiteOp hints into stub operations. (deprecated)

Function Signatures

```
tf.compat.v1.lite.experimental.convert_op_hints_to_stubs(  
    session=None, graph_def=None, write_callback=(lambda  
    graph_def, comments: None) )
```

Code Examples

```
tf.compat.v1.lite.experimental.convert_op_hints_to_stubs(  
    session=None,  
    graph_def=None,  
    write_callback=(lambda graph_def, comments: None)  
)
```

```
tf.compat.v1.lite.experimental.convert_op_hints_to_stubs(  
    session=None,  
    graph_def=None,  
    write_callback=(lambda graph_def, comments: None)  
)
```

Documentation

Converts a graphdef with LiteOp hints into stub operations. (deprecated)

This is used to prepare for toco conversion of complex intrinsic usages.

Note: only one of session or graph_def should be used, not both.
