https://www.tensorflow.org/api_docs/python/tf/compat/v1/losses/compute_weighted_loss

Computes the weighted loss.

Function Signatures

```
tf.compat.v1.losses.compute_weighted_loss( losses,  
weights=1.0, scope=None,  
loss_collection=ops.GraphKeys.LOSSES,  
reduction=Reduction.SUM_BY_NONZERO_WEIGHTS )
```

Code Examples

```
tf.compat.v1.losses.compute_weighted_loss(  
    losses,  
    weights=1.0,  
    scope=None,  
    loss_collection=ops.GraphKeys.LOSSES,  
    reduction=Reduction.SUM_BY_NONZERO_WEIGHTS  
)
```

```
tf.compat.v1.losses.compute_weighted_loss(  
    losses,  
    weights=1.0,  
    scope=None,  
    loss_collection=ops.GraphKeys.LOSSES,  
    reduction=Reduction.SUM_BY_NONZERO_WEIGHTS  
)
```

Documentation

Computes the weighted loss.

Returns

Raises

eager compatibility

The `loss_collection` argument is ignored when executing eagerly. Consider holding on to the return value or collecting losses via a `tf.keras.Model`.
