reshape(...)
```

Documentation

Public API for tf._api.v2.manip namespace

Functions

`batch_to_space_nd(...)`: BatchToSpace for N-D tensors of type T.

`gather_nd(...)`: Gather slices from params into a Tensor with shape specified by indices.

`reshape(...)`: Reshapes a tensor.

`reverse(...)`: Reverses specific dimensions of a tensor.

`roll(...)`: Rolls the elements of a tensor along an axis.

`scatter_nd(...)`: Scatters updates into a tensor of shape shape according to indices.

`space_to_batch_nd(...)`: SpaceToBatch for N-D tensors of type T.

`tile(...)`: Constructs a tensor by tiling a given tensor.
