https://www.tensorflow.org/api_docs/python/tf/compat/v1/math/divide

Computes Python style division of x by y.

Function Signatures

```
tf.compat.v1.math.divide( x, y, name=None )  
x = tf.constant([16, 12, 11])  
y = tf.constant([4, 6, 2])
```

Code Examples

```
tf.compat.v1.math.divide(  
x, y, name=None  
)
```

```
tf.compat.v1.math.divide(  
x, y, name=None  
)
```

```
x = tf.constant([16, 12, 11])
y = tf.constant([4, 6, 2])
tf.divide(x,y)
```

```
x = tf.constant([16, 12, 11])
```

```
y = tf.constant([4, 6, 2])
```

```
tf.divide(x,y)
```

```
numpy=array([4. , 2. , 5.5])>
```

Documentation

Computes Python style division of x by y.
