

tf.compat.v1.math.reciprocal_no_nan

Stay organized with collections Save and categorize content based on your preferences.

https://www.tensorflow.org/api_docs/python/tf/compat/v1/math/reciprocal_no_nan

Performs a safe reciprocal operation, element wise.

Function Signatures

```
tf.compat.v1.math.reciprocal_no_nan( x, name=None )  
x = tf.constant([2.0, 0.5, 0, 1], dtype=tf.float32)  
tf.math.reciprocal_no_nan(x) # [ 0.5, 2, 0.0, 1.0 ]
```

Code Examples

```
tf.compat.v1.math.reciprocal_no_nan(  
x, name=None  
)
```

```
tf.compat.v1.math.reciprocal_no_nan(  
x, name=None  
)
```

```
x = tf.constant([2.0, 0.5, 0, 1], dtype=tf.float32)  
tf.math.reciprocal_no_nan(x)  # [ 0.5, 2, 0.0, 1.0 ]
```

```
x = tf.constant([2.0, 0.5, 0, 1], dtype=tf.float32)  
tf.math.reciprocal_no_nan(x)  # [ 0.5, 2, 0.0, 1.0 ]
```

Documentation

Performs a safe reciprocal operation, element wise.

If a particular element is zero, the reciprocal for that element is also set to zero.

For example:

Returns

Raises
