https://www.tensorflow.org/api_docs/python/tf/compat/v1/math/special/expint

Computes the Exponential integral of x element-wise.

Function Signatures

```
tf.compat.v1.math.special.expint( x, name=None )  
exp(t) / t
```

Code Examples

```
tf.compat.v1.math.special.expint(  
x, name=None  
)
```

```
tf.compat.v1.math.special.expint(  
x, name=None  
)
```

```
tf.math.special.expint([1., 1.1, 2.1, 4.1]).numpy()  
array([ 1.8951179,  2.1673784,  5.3332353, 21.048464],  
dtype=float32)
```

```
tf.math.special.expint([1., 1.1, 2.1, 4.1]).numpy()
```

```
array([ 1.8951179,  2.1673784,  5.3332353, 21.048464],  
dtype=float32)
```

Documentation

Computes the Exponential integral of x element-wise.

The Exponential integral is defined as the integral of $\exp(t) / t$ from $-\infty$ to x , with the domain of definition all positive real numbers.

This implementation is based off of the Cephes math library.

Returns

scipy compatibility

Equivalent to `scipy.special.expi`
