Public API for tf._api.v2.mlir.experimental namespace

Function Signatures

```
convert_function(...)  
convert_graph_def(...)  
convert_saved_model(...)  
convert_saved_model_v1(...)  
run_pass_pipeline(...)
```

Documentation

Public API for `tf._api.v2.mlir.experimental` namespace

Functions

`convert_function(...)`: Import a `ConcreteFunction` and convert it to a textual MLIR module.

`convert_graph_def(...)`: Import a `GraphDef` and convert it to a textual MLIR module.

`convert_saved_model(...)`: Converts a `SavedModel` to MLIR module.

`convert_saved_model_v1(...)`: Converts a v1 `SavedModel` to MLIR module.

`run_pass_pipeline(...)`: Runs a pipeline over input module.

`tflite_to_tosa_bytecode(...)`: Converts TFLite flatbuffer to TOSA dialect in MLIR bytecode.

`write_bytecode(...)`: Writes an MLIR module out as bytecode.
