https://www.tensorflow.org/api_docs/python/tf/compat/v1/multinomial

Draws samples from a multinomial distribution. (deprecated)

Function Signatures

```
tf.compat.v1.multinomial( logits, num_samples, seed=None,
name=None, output_dtype=None )

# samples has shape [1, 5], where each value is either 0 or 1
with equal # probability. samples =
tf.random.categorical(tf.math.log([[0.5, 0.5]]), 5)
```

Code Examples

```
tf.compat.v1.multinomial(  
logits, num_samples, seed=None, name=None, output_dtype=None  
)
```

```
tf.compat.v1.multinomial(  
logits, num_samples, seed=None, name=None, output_dtype=None  
)
```

```
# samples has shape [1, 5], where each value is either 0 or 1 with  
equal  
# probability.  
samples = tf.random.categorical(tf.math.log([[0.5, 0.5]]), 5)
```

```
# samples has shape [1, 5], where each value is either 0 or 1 with  
equal  
# probability.  
samples = tf.random.categorical(tf.math.log([[0.5, 0.5]]), 5)
```
