Public API for `tf._api.v2.nest` namespace

Function Signatures

```
assert_same_structure(...)  
flatten(...)  
is_nested(...)  
map_structure(...)
```

Documentation

Public API for `tf._api.v2.nest` namespace

Functions

`assert_same_structure(...)`: Asserts that two structures are nested in the same way.

`flatten(...)`: Returns a flat list from a given structure.

`is_nested(...)`: Returns true if its input is a nested structure.

`map_structure(...)`: Creates a new structure by applying `func` to each atom in structure.

`pack_sequence_as(...)`: Returns a given flattened sequence packed into a given structure.
