Batch normalization.

Function Signatures

```
tf.compat.v1.nn.batch_norm_with_global_normalization( t=None,
m=None, v=None, beta=None, gamma=None, variance_epsilon=None,
scale_after_normalization=None, name=None, input=None,
mean=None, variance=None )
```

Code Examples

```
tf.compat.v1.nn.batch_norm_with_global_normalization(  
    t=None,  
    m=None,  
    v=None,  
    beta=None,  
    gamma=None,  
    variance_epsilon=None,  
    scale_after_normalization=None,  
    name=None,  
    input=None,  
    mean=None,  
    variance=None  
)
```

```
tf.compat.v1.nn.batch_norm_with_global_normalization(  
    t=None,  
    m=None,  
    v=None,  
    beta=None,  
    gamma=None,  
    variance_epsilon=None,  
    scale_after_normalization=None,  
    name=None,  
    input=None,  
    mean=None,  
    variance=None  
)
```

Documentation

Batch normalization.

This op is deprecated. See `tf.nn.batch_normalization`.
